<212> DNA
<213> pMC74 plasmid coding sequence

<400> 1

Numeric Identifier <213> can only be one of three choices, "Scientific name, i.e. Genus/species, Unknown or Artificial Sequence." For all sequences using "Unknown or Artificial sequence", for numeric identifier <213>, a mandatory feature is required to explain the source of the genetic material. The feature consists of <220>, which remains blank, and <223>, which states the source of the genetic material. Suggest using "Artificial sequence" for numeric identifier <213> and "Synthetic" for numeric identifier <223> in the mandatory feature. Please check for similar errors and make all necessary changes

As noted above, for each sequence, the <213> field should recite Artificial Sequence. The descriptions currently in this field should appear in the <223> field.

Application No: 10562627

Version No: 3.0

Input Set:

Output Set:

Started: 2009-08-20 22:30:10.535

Finished: 2009-08-20 22:30:11.973

Elapsed: 0 hr(s) 0 min(s) 1 sec(s) 438 ms

Total Warnings: 13

Total Errors: 0

No. of SeqIDs Defined: 13

Actual SeqID Count: 13
